

Cinelli means great bicycles. Cinelli means love of detail, expert craftsmanship, and 38 years of refining the framebuilders' art. Cinelli means heritage—it is the first bicycle to be put on permanent display at Chicago's Museum of Modern Art.

Cinelli has defined and redefined the bicycle and now offers a very limited production of the Cinelli LASER aerodynamic bicycle for road and track record attempts. Cinelli, undisputably the genius of the bicycle industry.

Ten Speed Drive Imports offers four superbly constructed CINELLI bicycles, all based on the top-of-the-line Super Corsa SLX frameset. Before the assembly, each frameset goes through our precision FRAME PREP™ process. Then our staff of professional mechanics carefully installs the race-proven components called for in the below specifications. Each wheel is a handcrafted product of the Ten Speed Drive Imports professional Wheelbuilding Division. In sum, the complete CINELLI bicycle is as painstakingly constructed as the CINELLI frameset itself.

## **Cinelli Laser Road and Track**

The genius of Cinelli Laser is available in both a road or a track version on a very limited basis to the USA market. Ten Speed Drive Imports is now available for custom orders or possible stock road shipments. The bicycles are available with Ambrosio ENERVIT solid disc wheels or with traditional spoked wheels.
